Catlettsburg, KY, 41129

Dear Greg:

I am writing to let you know how pleased we are with the charting systems we purchased from CEACT. As you know, we looked at several systems before selecting CEACT, and I am now more convinced than ever before that we made the right choice.

Not a day goes by that I do not receive some type of positive comment from our captains and pilots about the charting systems. Using the charting systems has given them so much more confidence. On several occasions, pilots have continued to navigate in situations that previously would have seen them tied to the bank. It is my opinion that using your charting systems has saved us enough in reduced delay time to pay for the systems' cost. This has resulted in not only significant savings for the company, but also enhanced efficiency and a higher level of safety.

The CEACT charting systems are easy to use and loaded with features that are useful for navigators on the western rivers. We have all been impressed by the fact that after purchasing the systems, you have continued to seek ideas and input from our pilots and captains about ways to improve the systems and make them an even more useful tool. You have incorporated many of these ideas in the system upgrades. We have also been very pleased with your service of the systems; however, we are especially impressed with the fact that they have required very little service. Most issues have been solved with a phone call and the overall reliability of the system is quite impressive.

We have recommended the CEACT charting systems to numerous others in our industry. We continue to be pleased with the features, ease of use, outstanding reliability, and great service. Please feel free to use us as a reference in the future for this great product.

Sincerely,

A handwritten signature in black ink that reads "Bruce Darst". The signature is written in a cursive style with a large, prominent "B" and "D".
